

Floral Mist

DESCRIPTIONS: **Floral Mist** is a concentrated odour neutralizer and sanitizer. It is water soluble and an excellent germicide cleaner which kills most germs and bacteria.

APPLICATIONS: **Floral Mist** aids in cleaning and general disinfecting in schools, hospitals, nursing homes, commercial buildings, hotels etc. It is ideal for deodorizing while mopping floors, shampooing carpets, cleaning restrooms, classroom, theatres, auditoriums, kitchens, bathrooms, locker rooms, automobiles, buses etc.

ADVANTAGES:

- **COMPLETELY SAFE**
Floral Mist is biodegradable, non-hazardous, non toxic and non-carcinogenic.
- **ENVIRONMENTALLY FRIENDLY**
It is a good replacement for toxic chlorinated solvents, harsh acids, alkaline or petroleum solvents.
- **CONTROLS AND REDUCES SPREAD OF VIRUS**
It aids in controlling, reducing and prevent cross-contamination in the spread of virus infections.
- **ELIMINATE ODOUR**
Beside sanitizing and disinfecting, **Floral Mist** also eliminates odour, leaving areas clean and gives a lingering scent after wash.
- **ECONOMICAL**
It can be diluted with water for cost saving.

DIRECTIONS:

1. Dilute 1 part of **Floral Mist** with 20 parts of water for mopping floor
2. To deodorize stale air: Dilute 1 part to 4 parts of water. Use trigger sprayer and lightly misted into the air and surroundings.
3. To sanitize surface: Dilute 1 part to 3 parts of water. Apply to surface directly using clean cloth or sprayer.

PROPERTIES:

Appearance: Green liquid solution.
Odour: Floral scent.
Active Ingredient: Benzalkonium chloride compound, a blend of fragrance and surfactant.
