SaniGuard® Total Release Fogger

Technical Data Sheet

By Dem Technology, 755 Albany St. Dayton, OH 45417, USA.

SaniGuard® Total Release Fogger is a registered and patented sanitizer that kills germs, bacteria and viruses on contact. **SaniGuard® Total Release Sanitizer** dries on contact, so there is no waiting, wiping or mess. The sanitizer is ideal for school, child care centre, homes, waiting rooms, restaurant, hospital, clinic and office etc..

SaniGuard® Total Release fogger sanitizes rooms & enclosed spaces in just 15 minutes. Just activate & leave. Unlike conventional cleaning, Total Release kills germs in all the hard-to-reach spots conventional cleaning techniques miss. Safe for use on all nonporous surfaces, including fabrics and electronics. Human & animal safe with no oral, skin, or inhalation toxicity. Each 8-oz. fogger treats up to 625 sq. ft. in one application. EPA-registered and proven to kill 99.99% of flu viruses, germs, and bacteria including: MRSA, ringworm, HIV, E. coli, and salmonella.

Features:

- Safe for all surfaces
 - Safe for food prep/eating areas
 - Kills germs on any vertical or flat surface
1. Great for tack rooms, trailers, viewing rooms and more
 2. Fogger sanitizes an entire room - walls, ceiling, floor and every nook and cranny - in just 15 minutes
 3. Safe for humans and animals
 4. EPA registered
 5. Kills 99.99% of influenza and 39 other germs, bacteria, fungus, and viruses in seconds
